

DANCEDECK PRO – PREMIUM LOOK WITH SUPERIOR DANCEABILITY - 39" x 39" wood straight-grain panels

DanceDeck Pro (DK Pro) is Signature's top-of-the line modular dance floor. Large panel sections (39" x 39") are made of solid maple or oak to create a truly elegant and spectacular dance floor suitable for the most upscale wedding and black-tie event. DK Pro is the only portable dance floor to offer matching wood edge pieces – offering a truly elegant finish to this beautiful floor. Used by hundreds of resorts, hotels, dance competitions and dance studios all over the world, every DanceDeck Pro floor is handcrafted to ensure quality – this portable dance floor will last for years!

DK Pro was designed by a team of professional dancers to meet their specific needs. After extensive research, they designed a floor that was easy to install, didn't come apart during aggressive dance moves, was especially beautiful, had built-in natural spring and above all was truly portable and economical.

DK Pro is the premier choice for large-panel portable dance floors. It is the most economical, simplest to assemble and above all, the best-looking portable dance floor on the market today. Signature's DK Pro dance floors have been used at some of the world's most prestigious dance competitions and special events.

ALL-WOOD CONSTRUCTION, INCLUDING EDGING

DK Pro portable dance floor panels are made of solid wood that sits in a sturdy aluminum frame. DK offers a straight-grain design, which provides a modern streamlined look that many dancers and spectators prefer.

One of the truly unique features of DanceDeck Pro are the wood edge pieces. No other portable dance floor on the market offers wood edging – others are either aluminum, metal or plastic. The matching edging gives the floor an elegant uniform look.

Each DK Pro all-wood panel is finished with 3 coats of polyurethane to provide a protective coating and a high-gloss finish.

Each DK Pro portable dance floor is handcrafted at our manufacturing facility in New York and undergoes rigorous quality checks and product testing.

PATENTED DESIGN FOR ELEGANCE, EASE OF USE & MAXIMUM COMFORT

DK Pro's unique manufacturing process and patented connection system makes our floor the quickest and simplest large-panel system to install. The patented connection system does not require tools to install and the lightweight panels (25 lbs.) can be handled by one person. DanceDeck Pro's all-wood portable dance floor panels snap in place to form a nearly seamless, elegant floor. Since the wood panels sit on top, not inside, of the aluminum frame, the visual result looks like a permanent, all-wood floor. This feature, combined with a high-gloss wood finish, makes the DanceDeck Pro portable dance floor an ideal choice for upscale facilities and events.

Many users of the DK Pro portable dance floor comment on its comfort and "danceability." DK Pro is cleverly designed – the wood floor panels are ¾" thick and are slightly elevated off the ground by the aluminum frame - to allow for spring in the floor. DK Pro has been used at prestigious dance competitions, exhibitions, clubs, hotels and resorts all over the world. DK Pro feels as good as it looks!

TRANSPORT & STORE EFFICIENTLY

DanceDeck Pro portable dance floors are just as simple to dismantle as they are to install. In fact, breakdown times are about half of install times. And as there are no screws or moving parts, there is nothing to lose or break during install or dismantle. We highly recommend the purchase of the DK Pro Transport Cart – which will greatly speed up installation and dismantle times and panels can also be stored efficiently and compactly on the cart – ready for future use.
